ADC KRONE Introduces Australian-Designed Shuttered Outlet for Hospital and School Environments

- *Shutter prevents contaminants from entering the outlet*
- *Contacts are protected from damage caused by inserting foreign objects into the outlet*
- *A 2-step feature to open the shutter provides added security*

BERKELEY VALE – 24 September 2009 – ADC KRONE (NASDAQ: ADCT; www.adc.com) today introduced an Australian-designed shuttered outlet product that is ideally suited for hospital or school environments. The new shuttered outlet has been designed for environments where safety and security are of paramount importance. The spring-loaded shutter closes safely by itself when a patch cord is removed.

“ADC KRONE Australia continues to meet the needs of its customers with the design and manufacture of innovative products from its facility in Berkeley Vale on the NSW Central Coast,” said Rhona Turnley, product manager for ADC KRONE. “The shuttered outlet is another clever home grown, feature-rich design that is suitable for both Category 6_A and Category 6 cabling.”

The outlet is available in three variants – CopperTen™ FMK, Category 6 FMK and Category 6 Rotoloc. The Rotoloc Outlet has an additional safety feature, a locking mechanism that prevents the outlet from being pushed through the faceplate. The Rotoloc technology is designed and developed by Hager, who has developed a Rotoloc Faceplate to fit with the ADC KRONE outlet.

About ADC KRONE
